Problem

There’s plenty of information for starting a business but finding the right answer for me is difficult

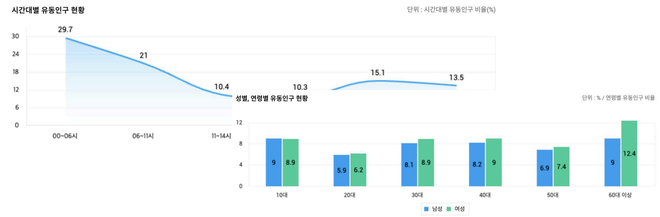
One-way Information Provision

"I went to a commercial district analysis site and there's a lot of data... but what's important for my restaurant to succeed?"

- Existing commercial district analysis services are provided focusing on quantitative indicators, lacking detailed analysis
- There's no interactive communication channel to answer individual entrepreneurs' specific questions, leaving them with the burden of making their own judgments from vast amounts of information

Complex Commercial District Comparative Analysis

"Area A has cheap rent, B has high foot traffic, and C has fewer similar businesses… how do I compare these to make a decision?"



- The process of comprehensively comparing multiple indicators and determining the optimal business type and location is very complex
- Each indicator has different sources and standards, causing confusion, and it's difficult to determine which information should be prioritized based on specific situations

Limited Access to Professional Consulting

"I want to get advice from an expert, but it costs 4 million won… It's also not easy to coordinate schedules with experts..."

예상 비용
3,500,000원 부터

	주요 내용	평균 컨설팅 비용
[illegible]	상권 분석, 인테리어, 메뉴 개발	200만~500만 원
운영 최적화	매출 분석, 고객 서비스 개선	300만~1,000만 원
마케팅 & 브랜딩	SNS 홍보, 브랜드 포지셔닝	200만~700만 원

- Professional startup consulting has high entry barriers with costs ranging from tens of thousands to millions of won
- There's a tendency to avoid it due to not only financial burden but also psychological distance and time constraints regarding expert consultation

This results in location selection and supply-demand mismatches that hinder success,
Early-stage entrepreneurs need a customized startup partner that anyone can approach without burden

We conducted surveys and in-depth interviews to deeply examine the problem

Survey

127 store startup preparers and early-stage entrepreneurs surveyed
Self-conducted survey period: : 2024.07~09

Are commercial district data complex and difficult to interpret?

Are you willing to use a startup consulting chatbot?

"Consulting involves time and cost burdens, but with an AI chatbot, I could ask anytime conveniently, so I think I'd use it frequently."

-32/Female/Cafe Owner

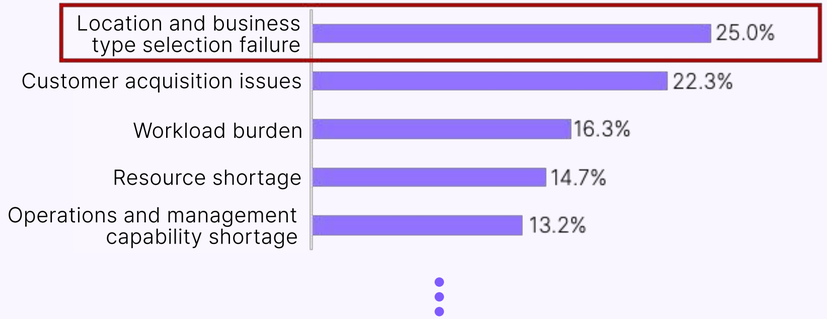
"I tried visiting commercial district sites but didn't know how to analyze them and they were too complex, so I gave up. It would be nice to have a chatbot that guides step by step by industry."

-29/Male/Retail Entrepreneur

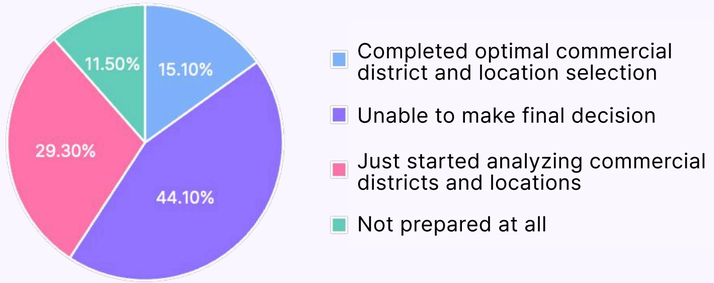
Research

Source: Finda, OpenUp users (1,840 respondents)

Why did retail entrepreneurs failed?



Retail owners preparing for re-startup



84.9% of re-entrepreneurs have not completed location selection, indicating that systematic commercial district analysis remains difficult even with previous business closure experience

Solution

ReLease Agent solves the problems entrepreneurs face with interactive AI chatbot

One-way Information Provision

Customized Interactive Consultation

Instead of indicators provided unilaterally by public services, the chatbot provides answers tailored to their specific situation

Complex Commercial District Comparative Analysis

Data-driven Comparative Analysis Support

The chatbot lists suitable commercial district and location alternatives and explains pros and cons together, helping with decision-making in a format that even beginners can understand

Limited Access to Professional Consulting

Accessible Consulting

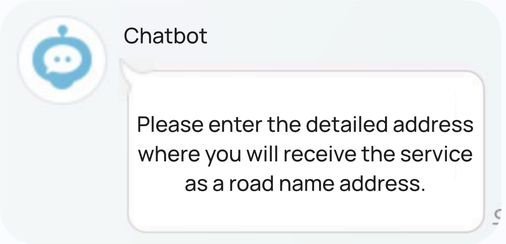
Instead of expensive expert consultations, you can ask unlimited questions at your preferred time at low cost through a 24/7 accessible chatbot

Solution

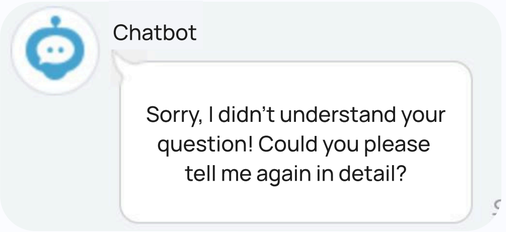
ReLease Agent chatbot is different from existing chatbots

Existing Chatbots

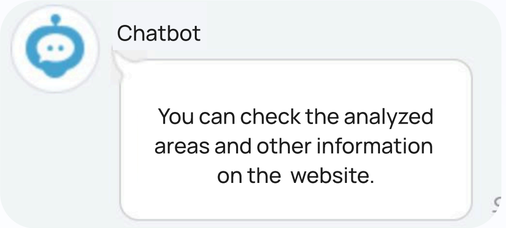
The reality of existing chatbots has been a series of frustrations



Limited functionality with simple address input only & one-way guidance



Unable to handle additional questions or conversations beyond built-in menus



Cannot show analysis results within the chatbot, leading to service disconnection

ReLease Agent Chatbot

ReLease Agent answers like an expert

Context-based Response

Provides advanced consultation by understanding previous conversation flow and entrepreneur's initial conditions

Free Q&A

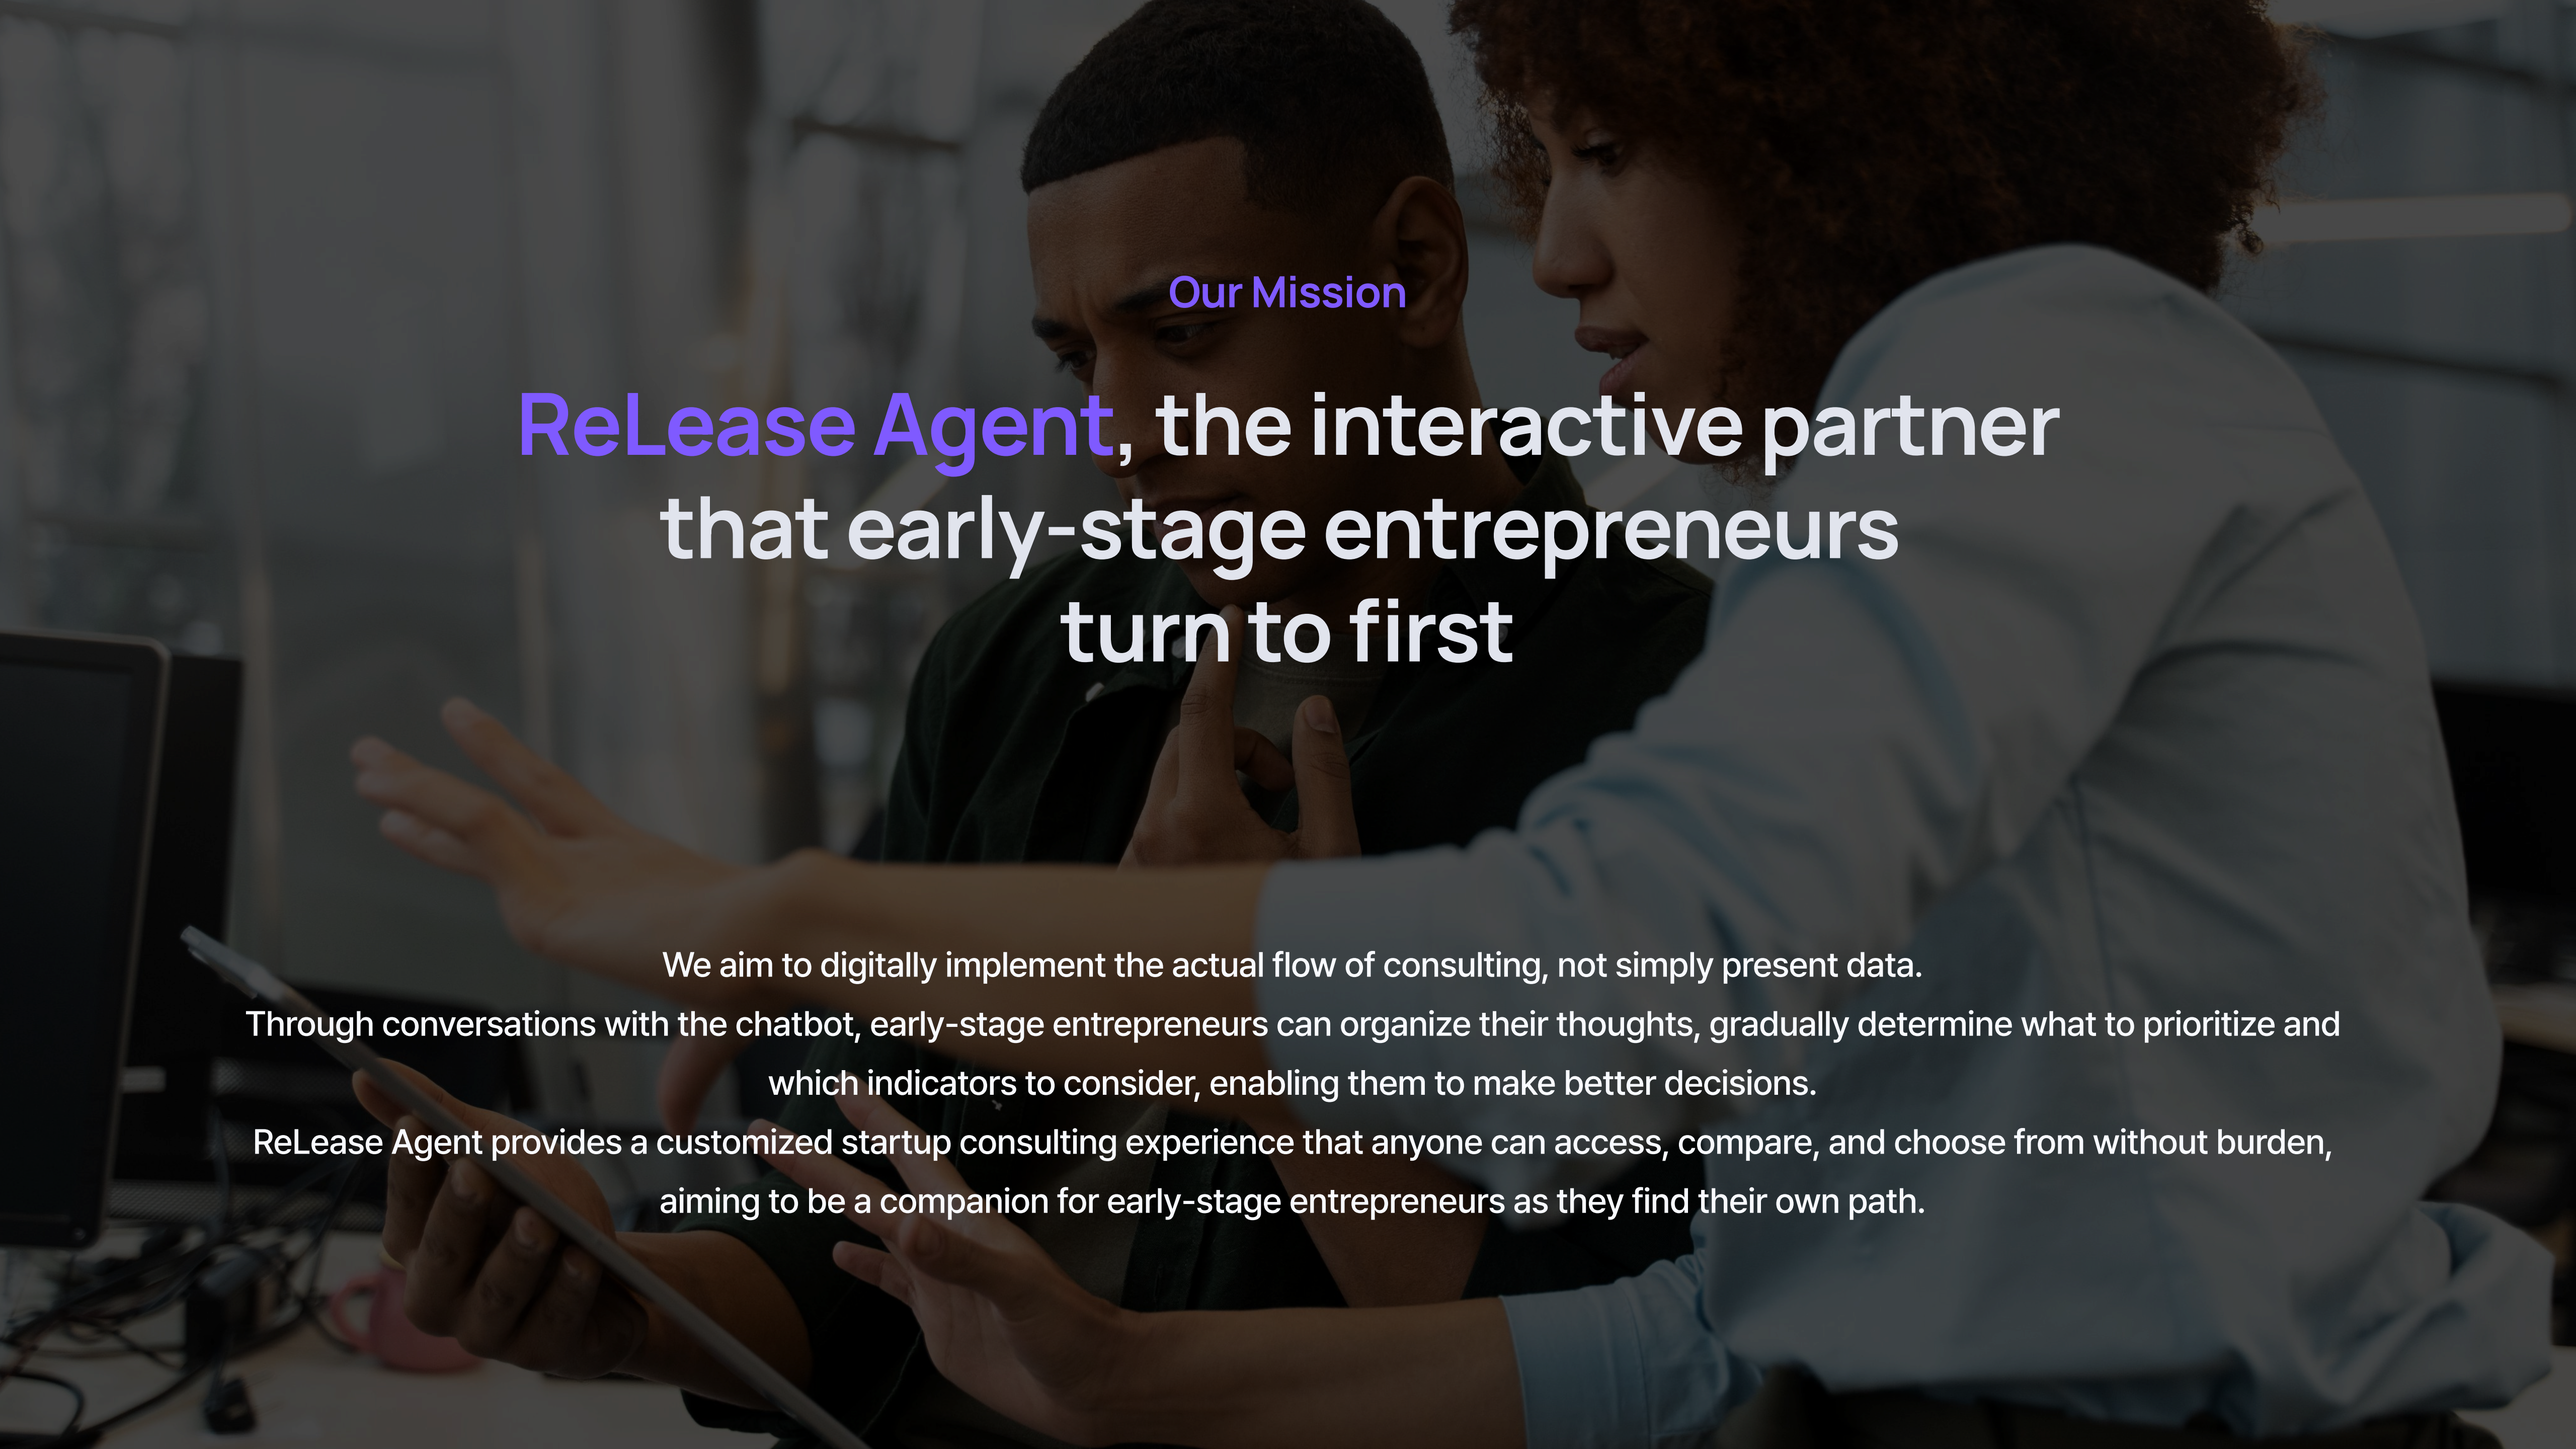
Responds to questions beyond built-in menus, allowing entrepreneurs to freely ask questions and engage in conversation

Data / Map Integration

Links public and private commercial district data in real-time and supports map-chatbot interaction through map connectivity

Comparative Analysis Support

Lists business type/commercial district alternatives within the chatbot and helps with optimal selection through comparative analysis



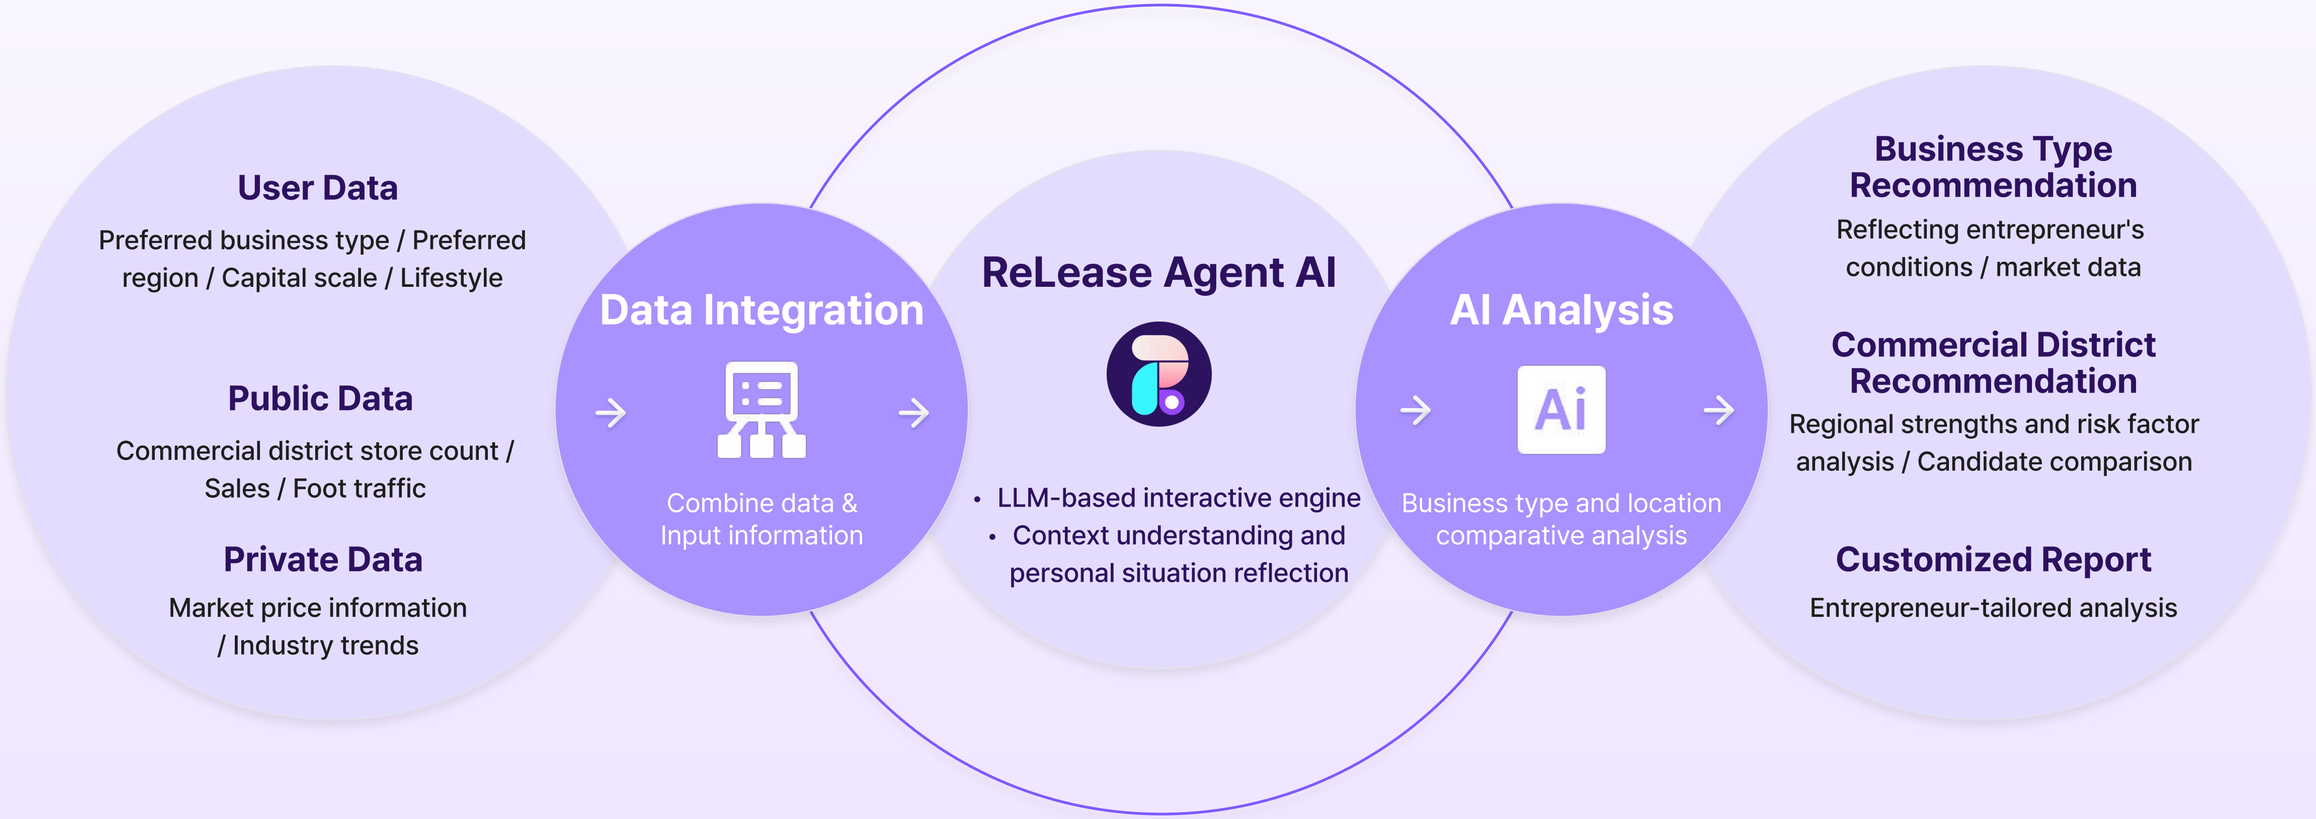
Our Mission

ReLease Agent, the interactive partner that early-stage entrepreneurs turn to first

We aim to digitally implement the actual flow of consulting, not simply present data.
Through conversations with the chatbot, early-stage entrepreneurs can organize their thoughts, gradually determine what to prioritize and which indicators to consider, enabling them to make better decisions.
ReLease Agent provides a customized startup consulting experience that anyone can access, compare, and choose from without burden, aiming to be a companion for early-stage entrepreneurs as they find their own path.

ReLease Agent provides an interactive solution that combines data-driven analysis with consulting experience

We provide customized insights that are not identical for everyone by considering both entrepreneurs' conditions and market data together



Check out our 5-step service for startup preparation and consulting at a glance

01

Basic Information

- Input entrepreneur's personal situation (budget, business type interests, etc.)
- Simple interactive questions

02

Industry Analysis

- Customized business type suggestions reflecting user's tendencies and conditions
- Business type recommendations and feasibility analysis

03

Commercial District Analysis

- Commercial district insights based on public and private data
- Commercial district candidate presentation and analysis

04

Report Generation

- Automatically organize business type and commercial district analysis results into reports
- Provide entrepreneur-customized summary

05

QnA

- Provide customized consultation for detailed questions
- Real-time Q&A support

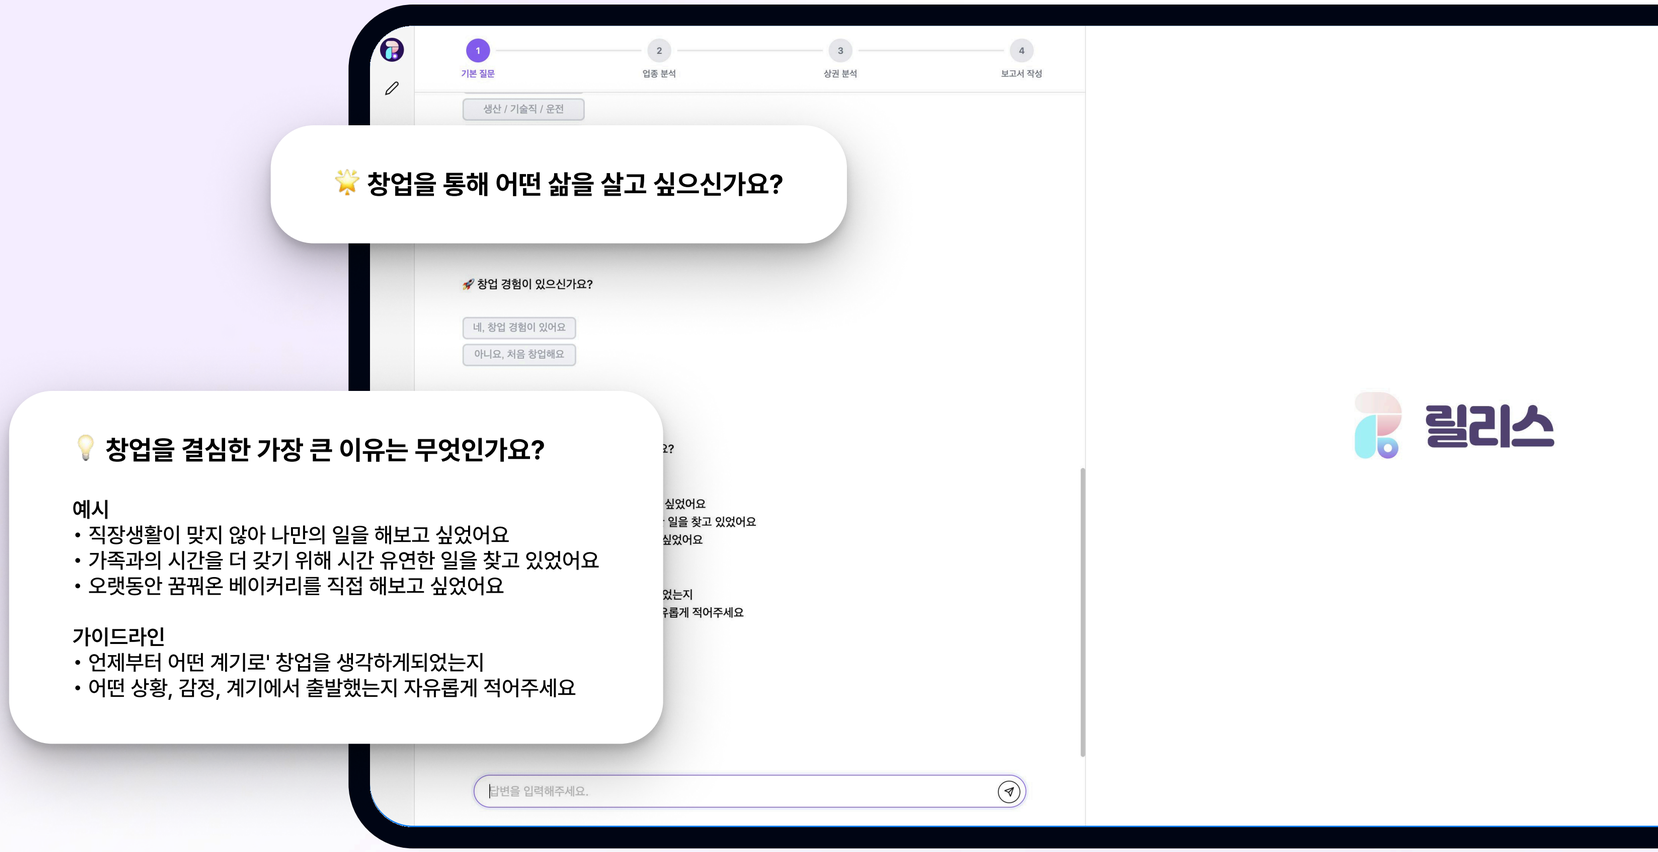
Designed as a 5-step journey reflecting the questions and flow of startup consulting, so entrepreneurs can naturally organize their situation and obtain necessary information

STEP 1 : Customized consultation start reflecting entrepreneur’s situation

01 Basic Information

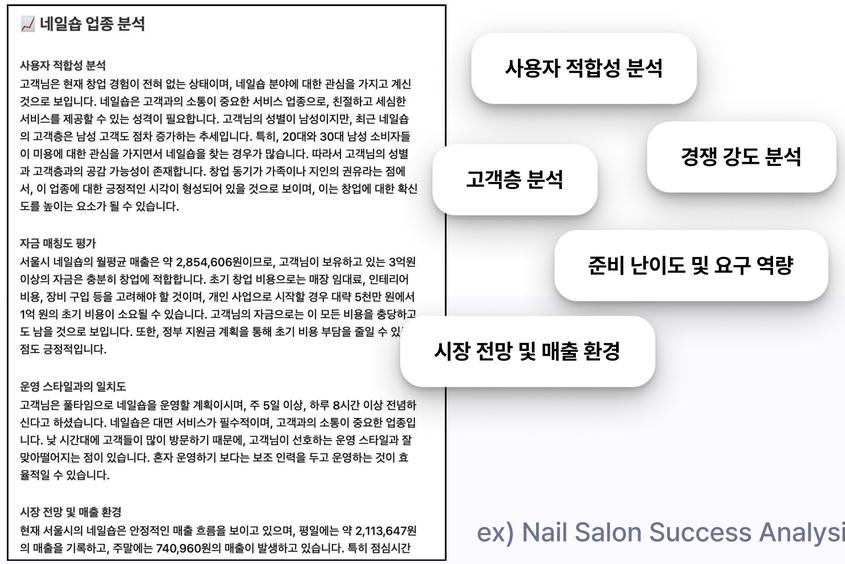
Input basic information including startup experience, motivation, business type of interest, capital scale, preferred region, etc. through simple surveys and interactive questions.

Information collected at this stage is customized and reflected in subsequent business type recommendations, commercial district analysis, and report generation.



Our Service

STEP 2: Exploring suitable industries reflecting entrepreneur’s tendencies

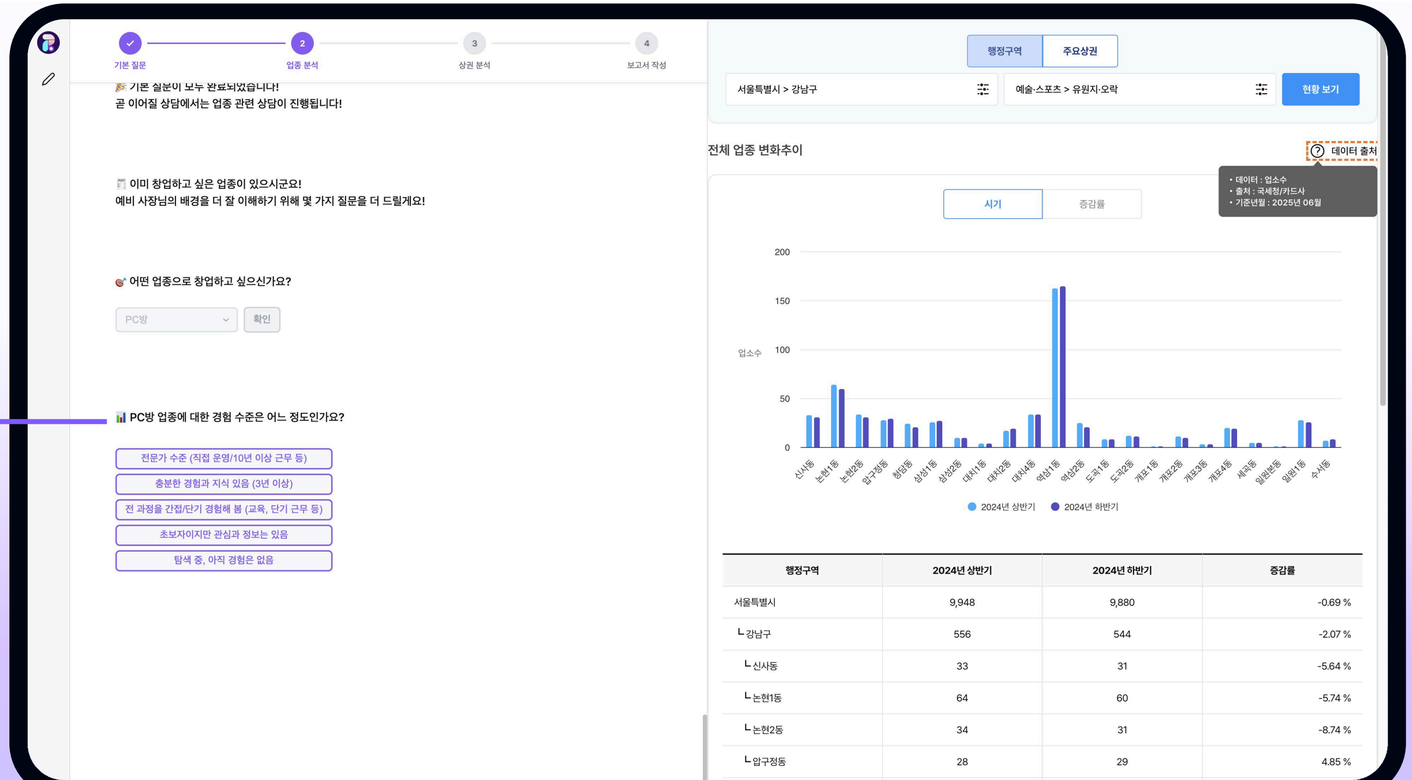


ex) Nail Salon Success Analysis

If you have a business type in mind, we provide in-depth analysis of that business type.
If the business type is not decided, customized business type recommendations are made through conversations with the chatbot.

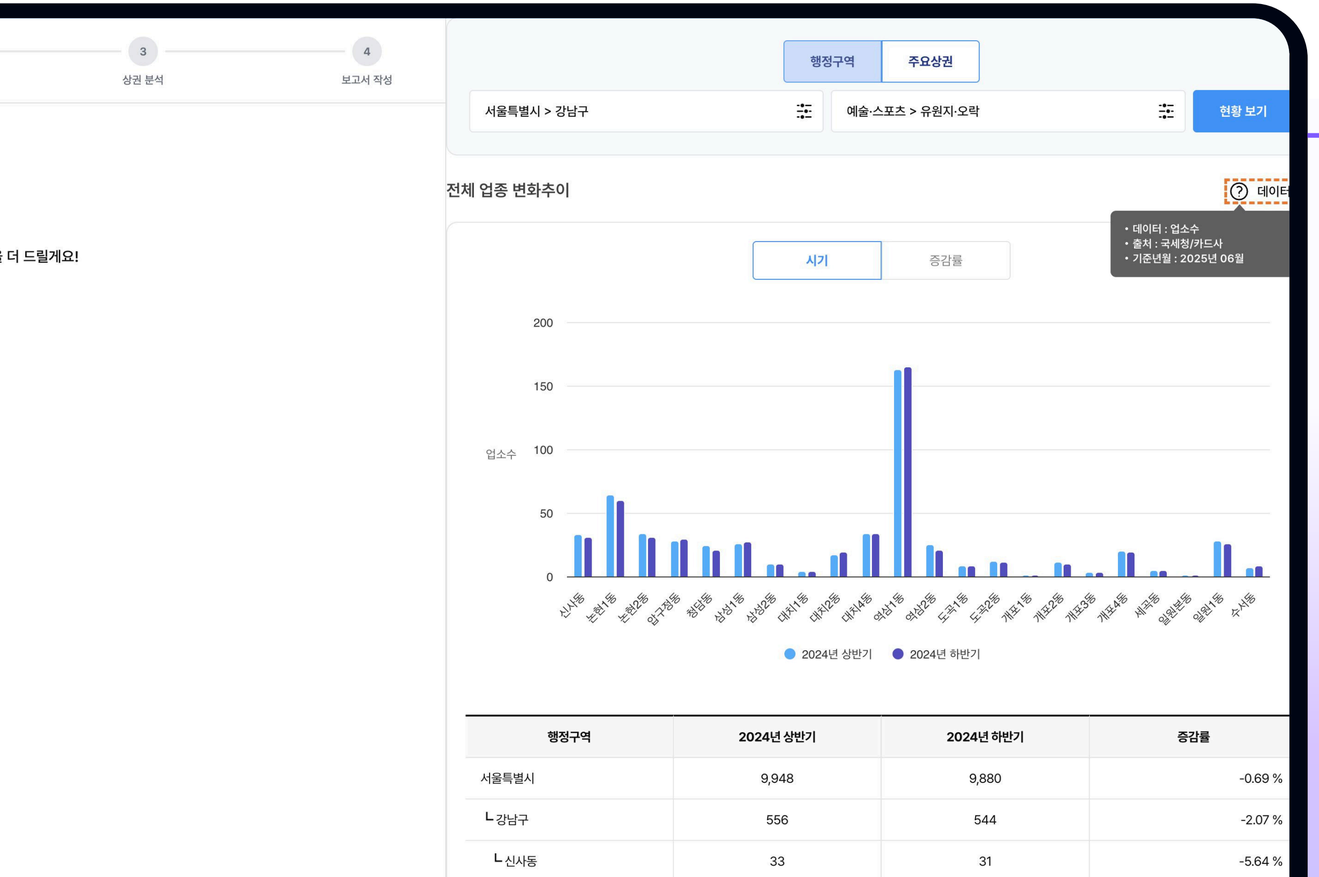
02 Industry Analysis

Based on the input basic information, we recommend suitable business types for entrepreneurs and analyze market potential, growth prospects, and risk factors of each business type. Through this, you can objectively review business types that match your tendencies and conditions.



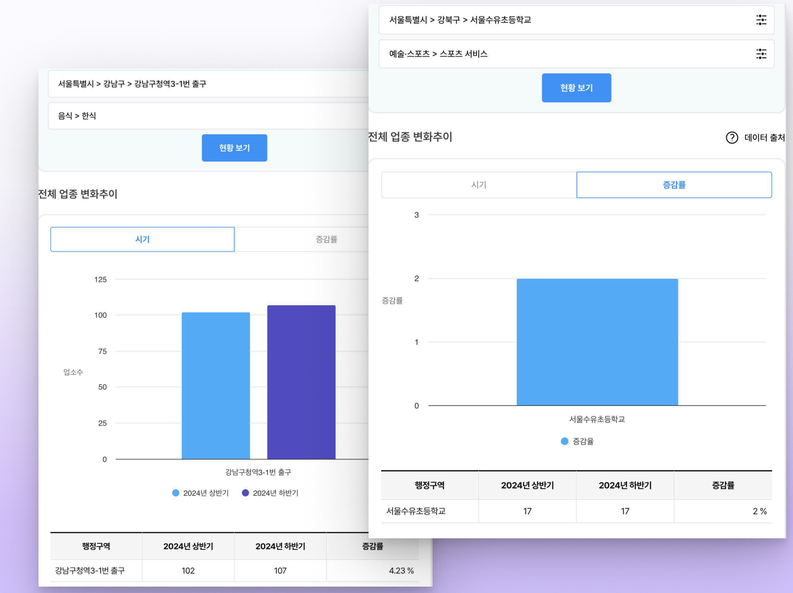
STEP 2: Exploring suitable business types reflecting entrepreneur's tendencies

02 Industry Analysis



You can check the number of stores and growth rates by industry, administrative district, and commercial area by time period.

Entrepreneurs can continue conversations with the chatbot while examining data-driven market conditions on the right side, enabling decision-making that considers both personal judgment and objective indicators.

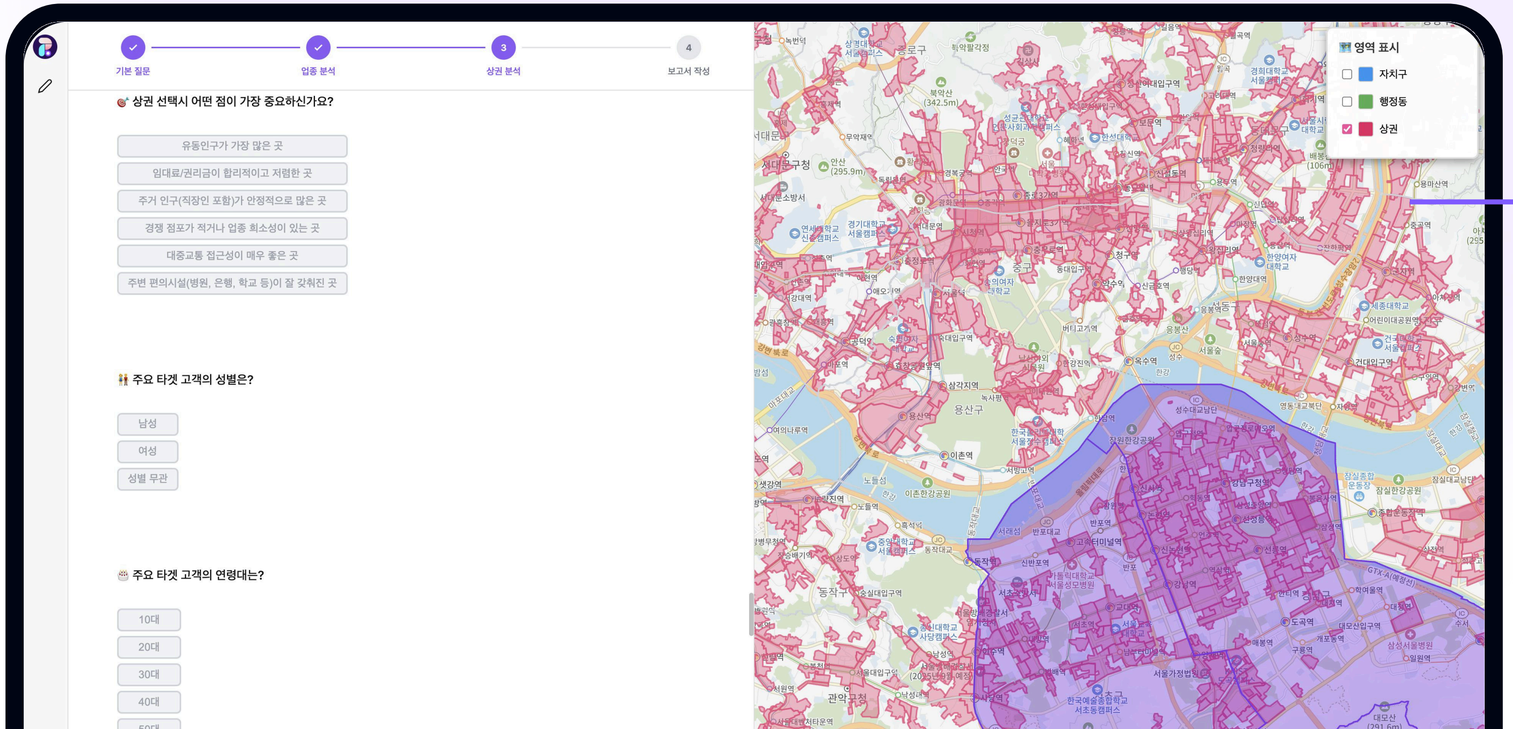


STEP 3: In-depth review of location candidates based on data

03 Commercial District Analysis

When you input your desired area or commercial district of interest, we present candidate locations that meet those criteria.

If you're already considering a specific area, we provide in-depth analysis of that area, and if you haven't decided yet, you can explore commercial districts that match your conditions.

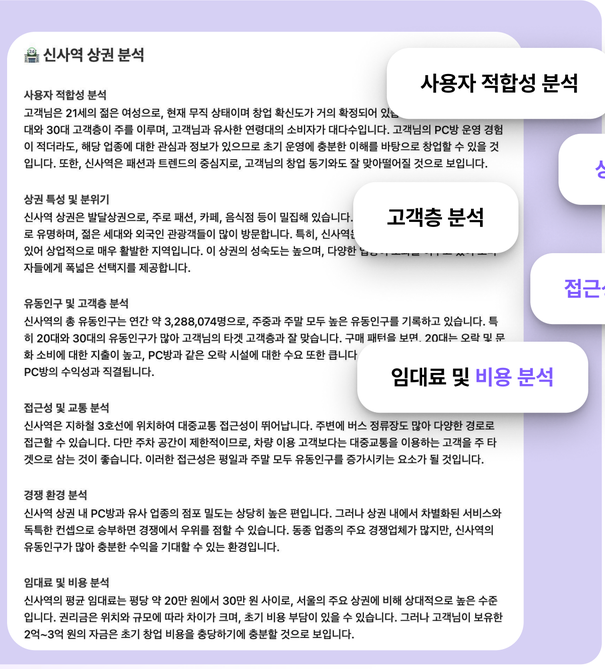


The map on the right is integrated, allowing you to select commercial districts of interest, preferred districts, etc.

STEP 3: In-depth review of location candidates based on data

03 Commercial District Analysis

Suitable candidate locations are presented based on selected criteria



COMMERCIAL DISTRICT CANDIDATES

Automatically presents candidate locations that match entrepreneur's conditions by combining public and private data

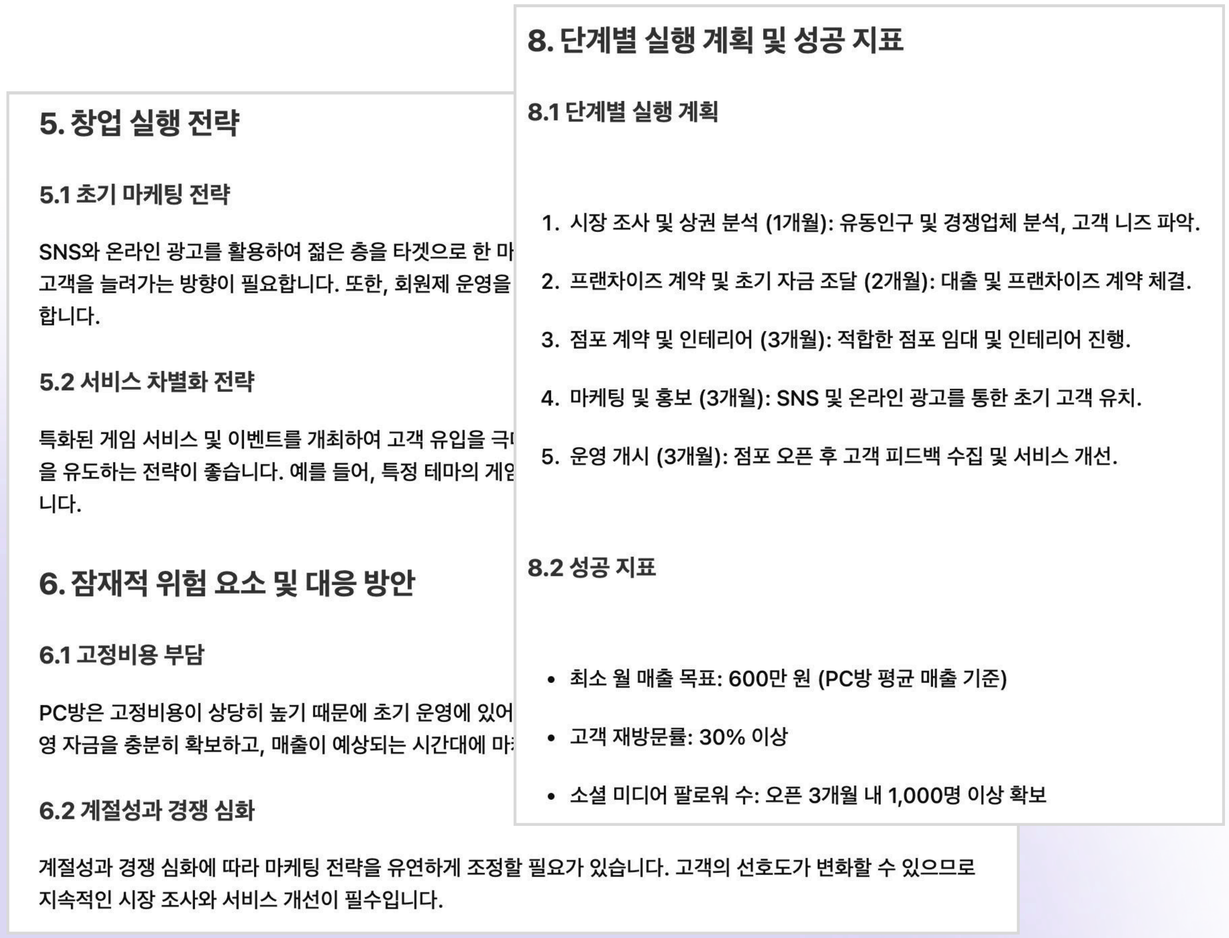
COMMERCIAL DISTRICT SELECTION AND FURTHER EXPLORATION

You can select commercial districts that appeal to you from the suggested options or explore further

SELECTED COMMERCIAL DISTRICT DETAILED ANALYSIS

Detailed customized analysis is provided for the selected commercial district

STEP 4~5: Summary report and QnA that entrepreneurs can use immediately



5. 창업 실행 전략

5.1 초기 마케팅 전략

SNS와 온라인 광고를 활용하여 젊은 층을 타겟으로 한 마
고객을 늘려가는 방향이 필요합니다. 또한, 회원제 운영을
합니다.

5.2 서비스 차별화 전략

영 자금을 충분히 확보하고, 매출이 예상되는 시간대에 마

6.2 계절성과 경쟁 심화

계절성과 경쟁 심화에 따라 마케팅 전략을 유연하게 조정할 필요가 있습니다. 고객의 선호도가 변화할 수 있으므로 지속적인 시장 조사와 서비스 개선이 필수입니다.

8. 단계별 실행 계획 및 성공 지표

8.1 단계별 실행 계획

1. 시장 조사 및 상권 분석 (1개월): 유동인구 및 경쟁업체 분석, 고객 니즈 파악.
2. 프랜차이즈 계약 및 초기 자금 조달 (2개월): 대출 및 프랜차이즈 계약 체결.
3. 점포 계약 및 인테리어 (3개월): 적합한 점포 임대 및 인테리어 진행.
4. 마케팅 및 홍보 (3개월): SNS 및 온라인 광고를 통한 초기 고객 유치.
5. 운영 개시 (3개월): 점포 오픈 후 고객 피드백 수집 및 서비스 개선.

8.2 성공 지표

- 최소 월 매출 목표: 600만 원 (PC방 평균 매출 기준)
- 고객 재방문률: 30% 이상
- 소셜 미디어 팔로워 수: 오픈 3개월 내 1,000명 이상 확보

04 Report Generation

Automatically organizes results derived from industry analysis and commercial district analysis into customized reports.

The report contains explanations of selected industries and candidate locations, key indicator summaries, and insights tailored to the entrepreneur's situation, ready for immediate use in decision-making.

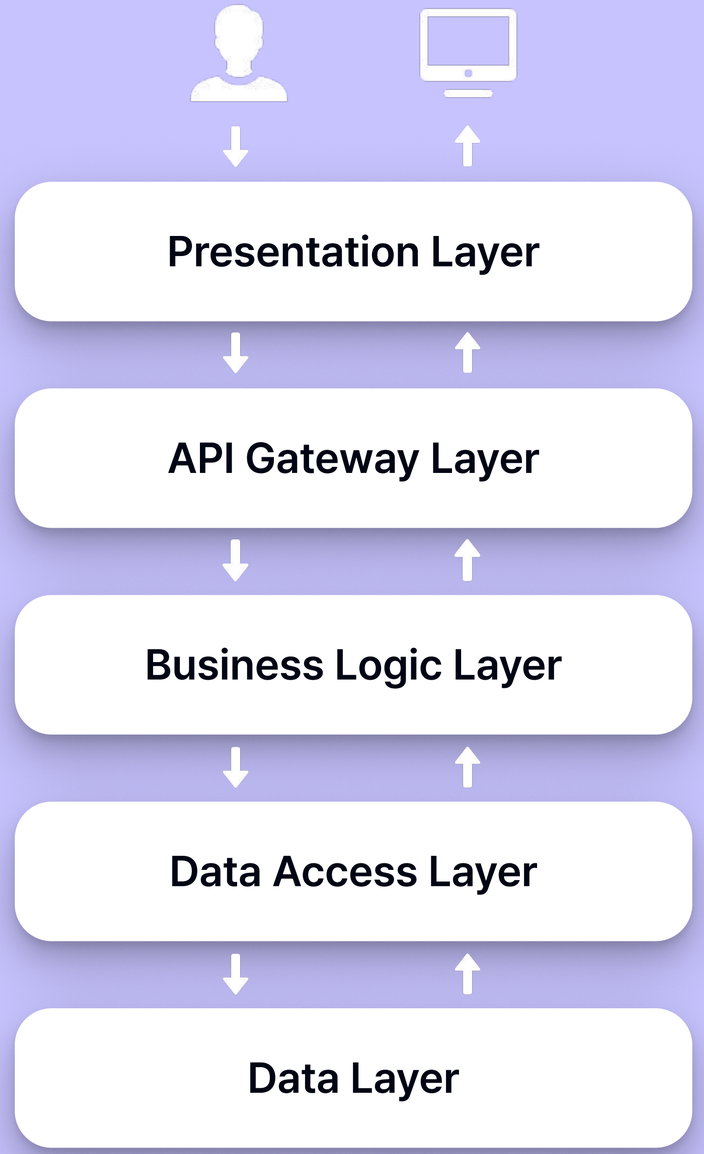
05 QnA

Entrepreneurs can freely ask questions about any concerns they have afterward.
Beyond industries and commercial districts, they can receive real-time consultation and supplementation for concerns throughout the entire startup process.

ReLease Agent has already completed an enterprise-level business service system

Key Achievements

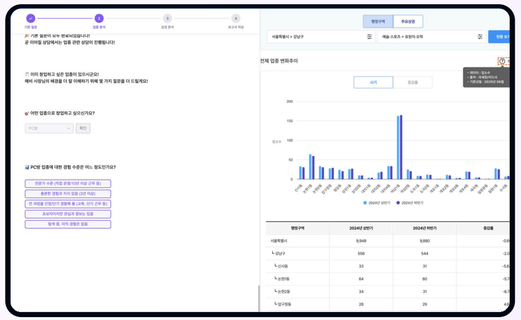
- We have secured system stability and maintainability through clear separation of responsibilities at each layer based on Layered Architecture.
- Through the application of MVC Pattern, we systematically and efficiently handle user requests while achieving both high stability and flexibility.
- We have maximized scalability and operational efficiency by introducing Microservices Pattern to the core business logic layer, configuring independent service components by domain



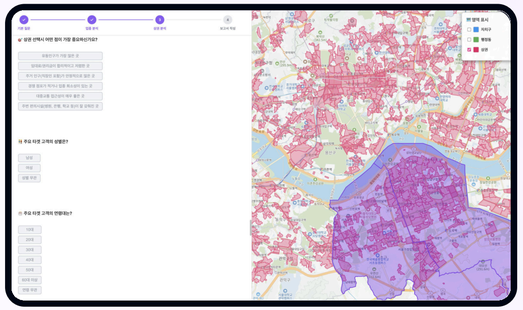
Technology_Presentation Layer

Our Presentation Layer is an intelligent interface

Precisely designed for users to communicate easily and most effectively



The left side of the screen provides a conversation interface, while the right side offers data visualization (maps, statistics) to maximize immersion



Provides optimal UI such as forms and interactive maps tailored to question types, guiding everyone to easily follow complex processes

Technology_Business Logic Layer

Different specialized AI agents work as a team to provide answers

Basic Stage

Collects basic information such as entrepreneur's capital scale, experience, and motivation Input from this stage becomes the foundation for subsequent customized analysis

Industry Stage

Confirms interest in industries and provides industry recommendations or conducts in-depth analysis as needed Provides optimal industry insights to entrepreneurs by reflecting market data and trends

Commercial District Stage

Conducts in-depth analysis of commercial districts chosen by entrepreneurs based on detailed indicators. When commercial districts are not determined, recommends and compares candidate locations that meet the conditions

Technology_Business Logic Layer

Industry Recommendation Crew

Financial Analyst

Defines realistic business scale and scope by considering initial investment costs, expected operating costs, break-even points, etc.

Provides financial guidelines →

Client Analyst

Gains deep understanding of users based on their information (experience, tendencies, values, etc.)

Trend Analyst

Captures latest market and trends by searching news, social media, etc.

Captures latest market and trends by searching news, social media, etc. →

← Provides profile reports and market & trend analysis reports

Industry Consultant

Recommends 3-5 most suitable industries for users and presents key consulting points for each recommended industry

Industry Analysis Crew

Data Analyst

Analyzes sales and technical statistical data by industry

Competitor Analyst

Empirically analyzes strategies, strengths, weaknesses, market share, etc. of major competitors within industries

Provides industry data reports and competitor analysis reports →

Financial Analyst

Analyzes industry profitability, cost structure, initial investment costs, expected revenue models, etc.

Marketing Analyst

Analyzes technology and products to discover differentiation points and presents ways to improve existing issues

Regulatory Analyst

Reviews laws, regulations, licensing requirements, policy changes, etc. related to industries

Handles additional user requirements / rework requests when re-recommendation required →

← Provides financial feasibility reports, business reports, legal risks of relevant businesses and regulatory reports

Industry Consultant

Presents industry direction and specific implementation plans

Technology_Business Logic Layer

Commercial District Recommendation Crew

Client Analyst
Gains deep understanding of users based on their information (experience, tendencies, values, etc.)

Trend Analyst
Captures latest market and trends by searching news, social media, etc.

Handles additional user requirements / rework requests when re-recommendation required

Provides profile reports and market & trend analysis reports

Commercial Distrct Consultant
Comprehensively evaluates commercial district advantages and risks based on qualitative information, then recommends 3-5 commercial districts

Commercial District Analysis Crew

Data Analyst
Analyzes data including population, infrastructure, sales, stores, etc. by commercial district

Competitor Analyst

Presents industry direction and specific implementation plans

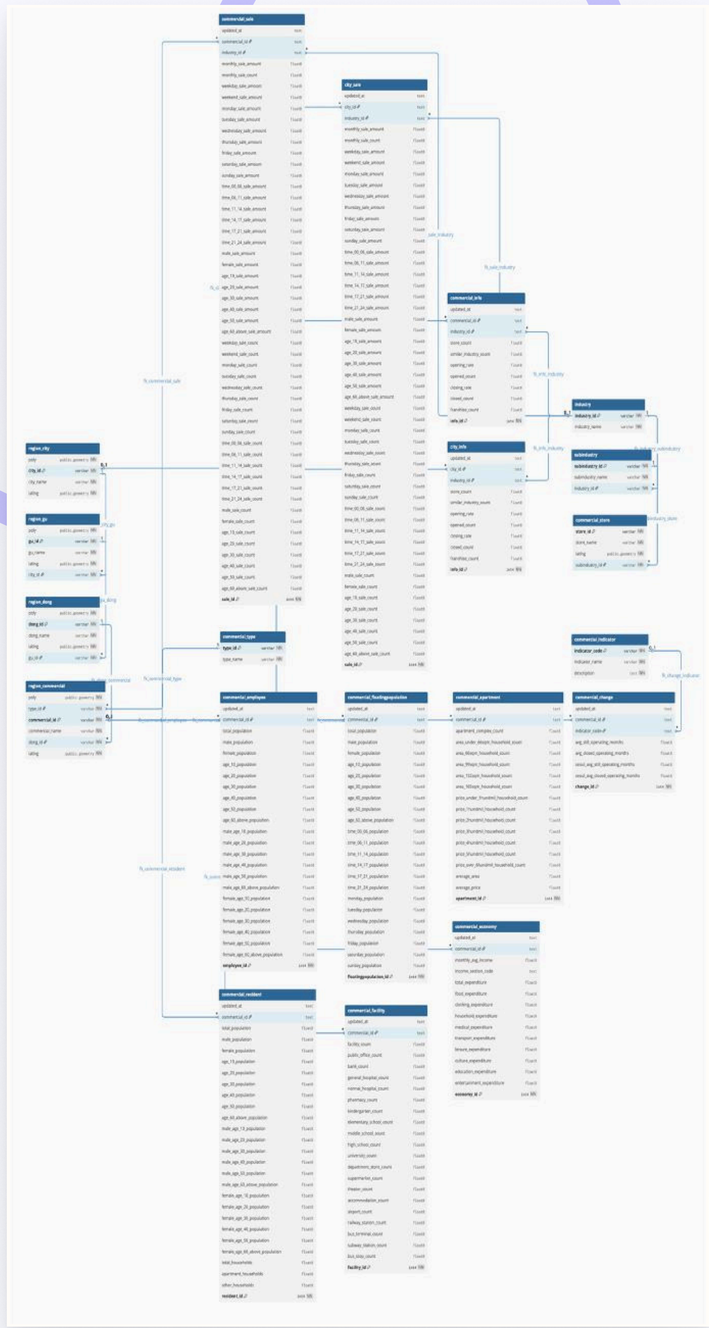
Data infrastructure utilizing Seoul commercial district APIs and DB

We integrate 13 commercial district-related APIs and databases provided by Seoul City for industry and location analysis

Data APIs

- Seoul City Boundary Data
- Administrative Gu Boundary Data
- Administrative Dong Boundary Data
- Commercial District Boundary Data
- Industry Sales Data
- Industry Store Data
- Commercial District Apartment Data
- Commercial District Attraction Facility Data
- Commercial District Resident Population Data
- Commercial District Working Population Data
- Commercial District Income-Consumption Data
- Commercial District Sales Data
- Commercial District Store Data

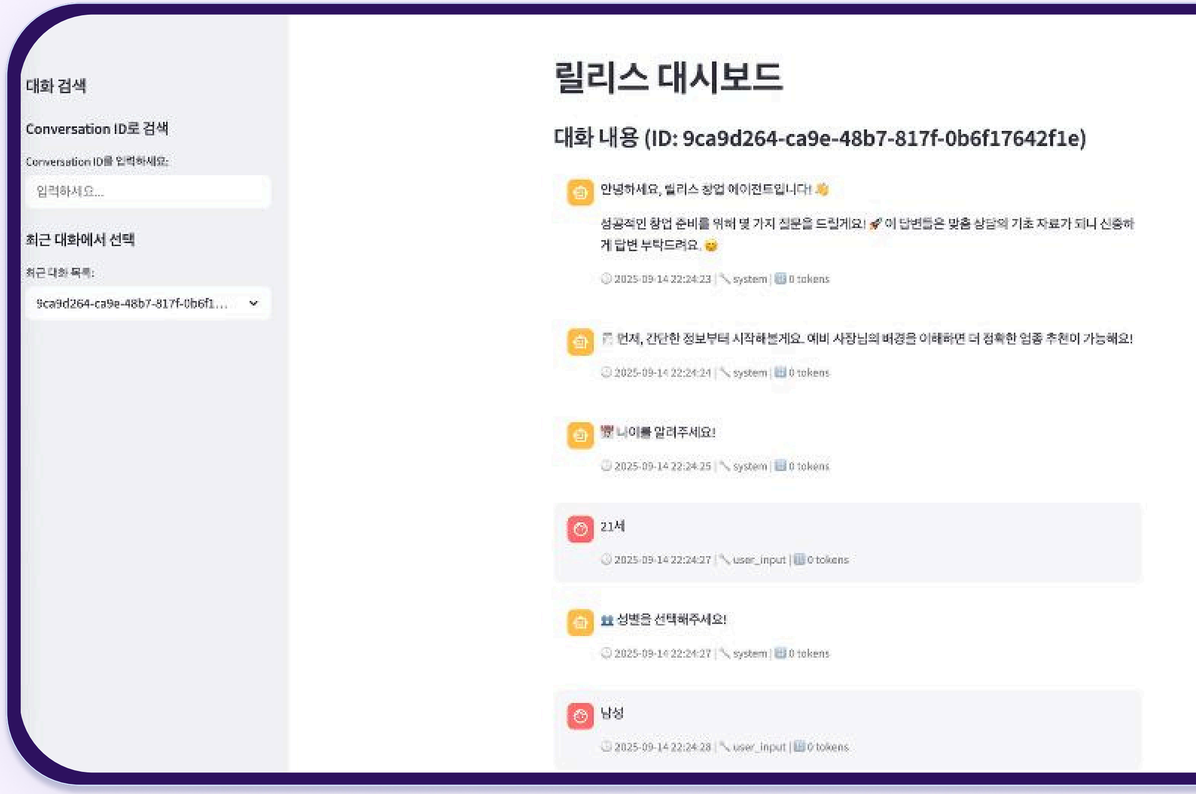
DB Diagram



For real-time monitoring and stability assurance, we built an integrated dashboard to strengthen service quality management

We monitor conversation logs and service metrics in real-time through an operator-dedicated dashboard. We verify chatbot response quality and detect errors early to provide stable services

- Conversation History Search and Monitoring
- User-specific Usage Status and Token Consumption Tracking
- Real-time Error and Abnormal Response Detection
- Service Performance Indicator Management (response speed, conversation length, etc.)



Customized solutions that various stakeholders can utilize

Prospective entrepreneurs at the starting line

Reduces uncertainty through industry recommendations and commercial district analysis, providing systematic support

Tip: While organizing direction through chatbot conversations, confirming through actual market cases or direct commercial district exploration is effective

Re-entrepreneurs who want to supplement failure factors

Can review past failure factors and reduce risks in new businesses through data-driven analysis

Tip: Organize points of caution based on previous failure and supplement strategies by comparing and verifying chatbot analysis results with your own thoughts

Consultants who need data-driven consultation

Reduces consultation preparation time by pre-reviewing reports and provides updated consulting based on latest data

Tip: It's effective to review reports in advance before consultation and present supplementary points by checking latest data during consultation

The expected benefits through collaboration represent a paradigm shift in startup support systems

Systematization of Startup Preparation Process

Transforms difficult startup preparation into systematic data-driven analysis. Goes beyond individual capacity and process-oriented industry analysis to increase startup success rates and reduce failure risks.

Innovation in Startup Consulting Process

Reduces consultation time through preliminary analysis and allows focus on in-depth discussions. Through standardized analysis, can support more entrepreneurs with various types of consulting quality within budget.

Enhanced Commercial Districts and Policy Effects

Achieves revenue balance through precise commercial district analysis and guides industry distribution suited to regional characteristics. Maximizes practical effects of public policies through balanced regional characteristics.
